

# Have a safe and Happy Halloween

## FOR TRICK OR TREATERS

- Have adults accompany trick-or-treaters to help them follow precautions.
- Wear a cloth or surgical mask (costume masks do not provide protection).
- Keep at least 6 feet apart from anyone not within your household.
- If trick-or-treating door to door, limit the time you spend at doorways and avoid crowded doorways.
- Keep your mask on and save the candy eating for when you return home.
- Once you return home, wash your hands before eating candy and after contact with frequently touched surfaces.
- Avoid trick or treating if you or anyone in your household is sick or has COVID-like symptoms, has been recently exposed and is in quarantine, has tested positive for COVID-19 and is currently in the isolation period, or is awaiting test results.

## FOR CANDY GIVERS

- Wear a cloth or surgical mask (costume masks do not provide protection).
- Only give out candy that is in factory-sealed packaging.
- Consider spreading treats on an outside table or placing individual bags ahead of time along the walkway leading to your home. Avoid hands in bowls.
- Encourage groups to wait their turn to avoid crowded doorways.
- Encourage trick-or-treaters to keep their masks on and save the candy eating for when they return home.
- Avoid handing out candy if you or anyone in your household is sick or has COVID-like symptoms, has been recently exposed and is in quarantine, has tested positive for COVID-19 and is currently in the isolation period, or is awaiting test results.
