## HUMBOLDT COUNTY REPORTS 121 COVID-19 CASES FOR THE MONTH OF JULY

WINNEMUCCA, Nev.—Humboldt County has been notified of 121 new cases of COVID-19 from Friday, July 1, through Sunday, July 31, bringing the county's cumulative total to 3996.

This total does not include positives from home-based or over-the-counter tests, as they are not included in official counts. In comparison, 160 positive cases were reported for the month of June.

The county has 3906 recovered and 30 active cases. During the month, 14 people have been hospitalized; four people are currently hospitalized. In all, 60 county residents have died from the virus, including a woman in her 70s who passed away on July 20, 2022.

In other news:

- The City of Winnemucca has stopped testing wastewater within the city limits for cumulative levels of SARS-CoV-2 RNA on July 12. The health board will no longer be able to use wastewater as a predictor of COVID-19 activity in the community, so please continue to be watchful of symptoms and test, quarantine and/or isolate as necessary.
- Humboldt General Hospital has closed its COVID-19 screening clinic. Patients now screen for COVID-19 through the Walk-In Clinic or through their HGH healthcare provider; three parking spots have been designated in front of the hospital's Mizpah Street side entrance where patients are tested. All patients and/or visitors must wear masks.
- Humboldt General Hospital is offering COVID-19 home tests free of charge at its main entrance and in patient clinics.
- If you suspect you have been exposed to COVID-19, if you are experiencing COVID- like symptoms, or if you have tested positive for COVID-19, please follow [this guidance](#) very carefully to mitigate the spread of the virus.
- As of today, 18,291 (+181) total COVID-19 vaccine doses have been administered including 8,212 (+8) initiated doses and 7,292 (+41) second doses. Currently, 48 percent of our population has initiated vaccination and 43 percent has completed vaccination.
- Of July's 121 reported positives, 35 or 29% were fully vaccinated, meaning a person completed a vaccine series, whether one dose or two, and two weeks have passed. A person does not have to be boosted in order to be considered fully vaccinated.
- Humboldt County has had nine breakthrough infections, meaning a fully vaccinated person who was hospitalized. Per the information provided by the State of Nevada, Humboldt County has

had one fully vaccinated death.

- Humboldt County is a low-risk transmission area according to the Centers for Disease Control [county tracker](#).
- As a reminder, as of February 2022, Nevada no longer requires masks in public places; however, employers and organizations, including school districts, have been encouraged to set their own policies as needed.

Brief summary information of Humboldt County's latest cases follows:

Case #	Gender	Age Range	Contact	Status
3876	Male	Teen	Under investigation	Recovered
3877	Woman	90s	Under investigation	Self-isolating
